

# Nicholas Silverman

*hydroclimatologist & water resources engineer*

## Education

- 2010–2014 **PhD**, *University of Montana*, Missoula, MT.  
Regional Hydroclimatology  
Dissertation: A Study of Hydroclimatic Dynamics in Mountain Landscapes
- 2001–2004 **MS**, *University of Washington*, Seattle, WA.  
Mechanical Engineering
- 1997–2001 **BS**, *Washington and Lee University*, Lexington, VA, *Cum Laude*.  
Physics and Engineering

## Computer Skills

- OS Linux, Unix, Windows
- Languages Python, R, Julia, Earth Engine, and Javascript
- Modeling HEC-RAS, WRF, HEC-HMS, and various land-surface and climate models

## Experience

### Research

- 2017–present **Research Scientist**, *Numerical Terradynamic Simulation Group*, Missoula, MT.  
Evaluating water resources and management practices in the Western USA using remote sensing and Google Earth Engine.
- 2014–2016 **Research Scientist**, *Montana Climate Office*, Missoula, MT.  
Worked to improve climate products and research for the state of Montana.
- 2014–2015 **Post-Doctoral Researcher**, *Montana State University*, Bozeman, MT.  
Studied the impacts of precipitation and temperature on nitrogen fertilizer management.
  - Developed weather forecasting opportunities for farmers to enable optimization of fertilizer application.
- 2011–2014 **Research Assistant**, *University of Montana, Geosciences*, Missoula, MT.  
Research focused on trends in regional scale hydrology and climatology.
  - Compared statistical and dynamical precipitation estimates in complex terrain.
  - Evaluated spatial patterns of uncertainty in winter precipitation measurements within mountain landscapes.
  - Developed methodology to disentangle stream flow trends driven by land cover change from those driven by climate change.

### Hydrology and Water Resources Engineering

- 2014–present **Principal and Owner**, *Adaptive Hydrology*, Missoula, MT.  
Started company to provide dynamic solutions that conserve, sustain, and balance water resources.
  - Conservation sciences
  - Climate vulnerability and resiliency,
  - Precision agriculture,
  - Drought and adaptive management,
  - Climate and land-surface modeling.

- 2004–2014 **Water Resources Engineer**, *Natural Systems Design*, Seattle, WA.  
 River restoration design engineer on projects around the Pacific Northwest region.
- Climate impact analysis on fluvial systems,
  - Sediment transport and hydraulics modeling,
  - Design of stream systems, large woody debris structures, fish passage through culverts, riparian landscape, integrated stormwater management facilities, and wetlands.
  - Construction supervision of hand and machine installed in-stream structures.

### Teaching

- 2017 **Adjunct Professor**, *University of Montana*, Missoula, MT.  
 Natural Resources Science and Management 201: Soils, Water, and Climate
- 2007–present **Instructor**, *University of Washington, Engineering Professional Programs*, Seattle, WA.  
 Fundamentals of Engineering review course - ethics section.
- Lecture covers engineering ethics for the Engineer-In-Training (EIT) exam.
- 2011–2013 **Co-Instructor**, *UNESCO-IHE Institute for Water Education*, Delft, The Netherlands.  
 River Restoration and Rehabilitation short course.
- Worked with instructors from The Netherlands to develop and teach a one-month intensive course on river rehabilitation for graduate students and mid-career water resource professionals.
  - Focus areas include: river morphology, morphodynamics, hydrology, and ecology; problem analysis, objective setting, and stakeholder involvement; and rehabilitation techniques and strategies.
- 2006–2007 **Assistant Instructor**, *University of Washington, Engineering Prof. Programs*, Seattle, WA.  
 Regional Road Maintenance ESA Training - BMPs for In-Water Work
- Field course in techniques for in-water maintenance around the state of Washington.
- 2005 **Assistant Instructor**, *AGC of Washington*, Seattle, WA.  
 Construction BMPs Field Training
- Field course on the installation and efficacy of standard Best Management Practices for storm water runoff.
- 2003–2004 **Teaching Fellow**, *NSF GK-12 Fellowship Program*, Seattle, WA.  
 Taught math to middle school students using inquiry-based teaching methods
- 2001–2011 **Teaching Assistant**, *University of Washington & Montana*, Seattle, WA & Missoula, MT.  
 Assisted in teaching mechanics of materials and introduction to geology lab

### Scientific Grants and Fellowships

- 2016 **USDA/NIFA/AFRI: Water for Agriculture Challenge Area**, *Improving Efficacy of Climate Information for Water Use Decisions*, Yung, L., Metcalf, L., Jensco, K., Silverman, N., Bauer, B., Sweet, M., \$499,201.
- 2016 **USGS: Water Resources Research Grant**, *Improving Climate Information to Enhance Drought Preparedness for Montana Agricultural Producers*, Yung, L., Metcalf, L., Jensco, K., Silverman, N., Bauer, B., Sweet, M., \$75,186.
- 2011 **U.S. Environmental Protection Agency Science To Achieve Results (STAR) Fellowship**, *Water Resource Management Strategies for Mountainous Forest Catchments Under Climate Change Scenarios: An Ecohydrologic Approach*, Silverman, N.L., \$126,000.
- 2011 **NASA Montana Space Grant**, *Calibration of Vegetation Parameters within an Ecohydrologic Model using Remote Sensing Techniques*, Silverman, N.L., \$20,000.  
 Awarded but declined

## Publications

### In Preparation

N.L. Silverman, J.N. Moore, and M.P. Maneta. Controls on Streamflow Interannual Variability from Driving Mechanisms. *Journal TBD*, 2018.

J.P. Donnelly, B.W. Allred, D. Perret, N.L. Silverman, J.D. Tack, V.J. Drietz, and D.E. Naugle. Seasonal drought in North America's sagebrush biome structures dynamic mesic resources for sage-grouse. *Ecosphere*, 2018.

J.N. Moore and N.L. Silverman. An energy-balance approach to understanding hydroclimatic change during the Late Pleistocene of the North American Great Basin. *Nature Scientific Reports*, 2018.

### In Review

N.L. Silverman, B. Allred, P. Donnelly, T. Chapman, J. Maestas, J. Wheaton, J. White, and D. Naugle. Low-tech riparian and wet meadow restoration increases vegetation productivity and resilience across semi-arid rangelands. *Restoration Ecology*, 2018.

A. Chadwick, A. Stanley, T. Gignoux, N. Silverman, and J. Tollefson. Improving Natural Sediment and Water Storage in the Upper Clark Fork River Basin: Estimated Costs and Benefits of Beaver Habitat Restoration. *Ecological Restoration*, 2017.

---

## Selected Presentations

- Feb 2018 **The grass is always greener: Quantifying outcomes of low-tech riparian and wet meadow restoration using remote sensing**, *Silverman, N.L.*, Society for Range Management Annual Conference, Reno, NV. **Oral.**
- Mar 2017 **Montana Climate Change**, *Silverman, N.L.*, USFS Drought Workshop: Improving Drought Resilience - Forest to Valley Bottom, Choteau, MT. **Keynote: Oral.**
- Oct 2016 **Building Montana Water Resource Resiliency through Information Gathering and Communication at Multiple Space and Time Scales**, *Silverman, N.L. and Jencso, K.*, Montana American Water Resources Association Conference, Fairmont Hotsprings, MT. **Keynote: Oral.**
- Dec 2015 **An Introduction to Montana Climate Science**, *Silverman, N.L.*, Montana Agriculture Extension Climate Conference, Bozeman, MT. **Oral.**
- Dec 2014 **Disentangling the driving mechanism of streamflow trends using runoff sensitivity to land use and climate change**, *Silverman, N.L., Moore, J.N., Maneta, M.P.*, American Geophysical Union Fall Conference, San Francisco, CA. **Oral.**
- Dec 2014 **Ecohydrological and topographical controls on soil moisture and soil temperature for a snow-dominated watershed in the Pacific Northwest of North America**, *Chatanantavet, P., Maneta, M.P., Wilcox, A., Silverman, N.L.*, American Geophysical Union Fall Conference, San Francisco, CA. **Poster.**
- Dec 2014 **Attribution of hydrologic trends using integrated hydrologic and economic models**, *Maneta, M.P., Brugger, D., Silverman, N.L.*, American Geophysical Union Fall Conference, San Francisco, CA. **Poster.**
- Mar 2014 **Evaluating Streamflow Trends Using Runoff Sensitivity to Land Use and Climate Change**, *Silverman, N.L., Moore, J.N., Maneta, M.P.*, Northwest Scientific Association Conference, Missoula, MT. **Poster.**
- Dec 2013 **Changes in Winter Precipitation within Mountain Landscapes: Spatial Patterns and Uncertainty**, *Silverman, N.L., Maneta, M.P.*, American Geophysical Union Fall Conference, San Francisco, CA, **Poster.**
- Dec 2013 **Linked Modeling Approach to Assess Climate Change Effects on Hydrogeomorphic Processes and Aquatic Ecosystems: Example for a Watershed in Western Montana**, *Chatanantavet, P., Wilcox, A., Maneta, M.P., Silverman, N.L.*, American Geophysical Union Fall Conference, San Francisco, CA. **Poster.**
- Sep 2013 **Measuring future changes in winter precipitation within mountainous regions**, *Silverman, N.L., Maneta, M.P.*, American Water Resources Montana State Chapter Conference, Bozeman, MT. **Poster.**
- July 2013 **A Bayesian assessment of the spatial bias in the estimation of winter precipitation over regions of complex terrain**, *Silverman, N.L., Maneta, M.P.*, CUAHSI Conference on Hydroinformatics, Logan, UT. **Poster.**
- Apr 2013 **Downscaling and Correcting Climate Data Over Complex Terrain**, *State Meeting on Water Resources*, *Silverman, N.L., Maneta, M.P.*, Helena, MT. **Invited talk.**

- Dec 2011 **Evaluation of a WRF dynamic downscaling simulation over Western Montana**, *Silverman, N.L., Maneta, M.P.*, American Geophysical Union Fall Conference, San Francisco, CA. **Poster.**
- Apr 2011 **Ecohydrologic model validation using remote sensing techniques**, *Silverman, N.L., Maneta, M.P.*, University of Montana Graduate Student and Faculty Research Conference, Missoula, MT. **Poster.**
- Apr 2011 **Validation of a spatially distributed ecohydrologic model using remote sensing techniques**, *Silverman, N.L., Maneta, M.P.*, Montana Space Grant Consortium Student Research Symposium, Bozeman, MT. **Poster.**
- Oct 2010 **A spatially distributed ecohydrologic model for forested catchments**, *Silverman, N.L., Maneta, M.P.*, American Water Resources Association Montana Conference, Helena, MT. **Poster.**
- Jun 2003 **Engineering a retinal scanning laser display with integrated accommodative depth cues**, *Silverman, N.L., Schowengerdt, B., Seibel, E.*, Society for Information Displays Conference, Baltimore, MD, **Oral.**

## Selected Project Experience

- 2018 **Hydrologic Data Management Framework**, *SciGaia, LLC*, Bozeman, MT.  
Provided novel tools and algorithms for calculating soil water enhancement potential and crop water use from satellite remote sensing. Aided in climate and water resources data acquisition.
- 2017 **On-Farm Precision Agriculture Experimentation**, *Montana State University*, Missoula, MT.  
Worked with farmers, researchers, and economists to develop statistical and machine learning algorithms for maximizing profit through variable rate fertilizer optimization in winter wheat.
- 2017 **Montana State Climate Assessment**, *Institute on Ecosystems*, Missoula, MT.  
Climate sector lead for the Montana statewide climate impact assessment. Providing high-resolution climate projections and historical trends to evaluate future forestry, water, and agriculture impacts across the state.
- 2014 **Optimizing Fertilizer Application in Winter Wheat using Seasonal Forecasting**, *Montana Fertilizer Advisory Committee*, Missoula, MT.  
Developed a simple web application for growing season precipitation and temperature forecasts using ENSO indices.
- 2015 **Beaver Habitat Suitability Model**, *Clark Fork Coalition and Lolo National Forest*, Missoula, MT.  
Developed statistical model to predict beaver habitat suitability within Lolo National Forest. Model was based on a habitat suitability index (HSI) which was calculated using extensive field data.
- 2014 **Hydroclimatic Trends in Mountain Landscapes**, *Univ. of Montana, PhD Thesis*, Missoula, MT.  
Used state-of-the-art climate, land-surface, and statistical models to evaluate changes and uncertainty of hydroclimatic conditions in Western Montana.
- 2013 **Rangeland Sustainability Assessment**, *Private Ranch*, Paradise Valley, MT.  
Project manager and lead Hydrologist on a team of four scientist working to develop a conservation base-line assessment for a 15,000 acre private ranch in Paradise Valley, MT. Assessment included in-depth analysis of agriculture, hydrology, forestry, wildlife, rangeland, and facility operations.
- 2010 **Littlebrook Creek Habitat Assessment**, *Friends of Littlebrook Creek*, Seattle, WA.  
Evaluated salmonid habitat throughout Littlebrook Creek, an urban watershed within the City of Seattle. Developed a multi-phase restoration plan for over a mile of stream channel.

## Workshops and Training

- 2016 **U.S. National Soil Moisture Monitoring Workshop**, Boulder, CO, Invited to participate in a 3-day workshop identifying the existing gaps in a nationwide soil moisture monitoring network..
- 2013 **Software Carpentry Bootcamp**, Logan, UT, Two-day workshop on optimizing scientific programming.

- 2011 **NCAR Command Language (NCL) Workshop**, Laramie, WY, Four-day workshop taught by NCAR NCL developers.
- 2011 **Weather Research & Forecasting (WRF) Model Workshop**, Boulder, CO, One-week training taught by NCAR model developers.
- 2009 **Hec-Ras Open Channel Flow Modeling and Sediment Transport**, Tacoma, WA, Five-day training course through River Restoration Northwest.
- 2007 **Fluvial Geomorphology for Engineers**, Asheville, NC, Taught by Dr. Richard Hey and Wildland Hydrology, Inc..

## Professional Organizations and Licensure

- Professional Civil Engineer, State of Washington, #44272
- Professional Civil Engineer, State of Montana, #20297
- American Geophysical Union
- Society for Range Management

## Personal Projects

- Spring 2017 **Challenges Faced in Managing Public and Private Land**, Steens Mountain, OR.  
Explored the intersection of public and private land in southeast Oregon through a backcountry ski adventure up Steens Mountain. Provided scientific background and editing for article published in Mountain Magazine.
- Summer 2012 **Mountain Mysteries and Climate Change**, Glacier Nat'l Park, MT.  
As part of a week-long adventure through three of the major watersheds of North America I hiked across Glacier National Park and paddled out one of its drainages in order to draw attention to the complexities of mountains and climate change. The adventure has been published in Mountain Magazine.
- Spring 2010 **USAID Global Water for Sustainability and MaraFlows Program**, Kenya, Africa.  
Traveled through Mara River Basin in Eastern Africa with local and international scientists coordinating strategies for upcoming hydrologic research within the basin. Attended workshops on Payment for Ecosystem Services (PES) schemes, Environmental Flow Assessments, and rural water resource development.
- Fall 2009 **www.Chattahoochee.Wordpress.com**, Southeast U.S.A.  
Technical advisor on river conservation and website map layout for professional writer and photographer traveling by canoe from source to sea on the Chattahoochee River in Georgia, Alabama, and Florida.
- 2006-2008 **www.TheSourceLoop.Blogspot.com**, North and South America.  
Created a "thoughtful adventure" blog with colleagues to study and educate readers on the source of various American amenities, including: Amazon River oil production in Ecuador, Hydroelectric exploration on the Futaleufu River in Chile, and gold mining in the Atacama Desert of Argentina.
